## AMENDMENTS TO THE CLAIMS

## In the claims:

## 1-2) (Cancelled)

22. (Currently Amended) A compound, and pharmaceutically acceptable salts, solvates and produces thereof, having the formula (3):

 $\begin{array}{c} \begin{array}{c} \begin{array}{c} \\ \\ \\ \\ \end{array} \end{array}$ 

where X is NH- and R<sub>1</sub> is present;

X<sub>2</sub> is from one to three atoms, and if R<sub>3</sub> is not present, is independently selected from the group consisting of hydrogen, an alkyl group, an alkenyl group, a heteroalkyl group and a heteroalkenyl group, and if R<sub>3</sub> is present, X<sub>2</sub> is selected from the group consisting of an alkylene group, a heteroalkylene group, an alkenylene group and a heteroalkenylene group;

and any carbons or nitrogens of said alkyl group, alkylene group, alkenyl group, alkenylene group, heteroalkyl group, heteroalkylene group, heteroalkenylene group or heteroalkenyl group can optionally be substituted with a straight or branched lower alkyl group or alicyclic group of from 1 to 6 carbons;

## R<sub>3</sub> is optionally present;

R<sub>1</sub> is selected from the group consisting of hydrogen, an alicyclic group, a heterocyclic group, an aryl group, a heterocryl group, an alkylaryl group, a alkylheterocryl group, a substituted aryl group, a substituted alkylaryl group and a substituted alkylheterocryl group;

if present, R<sub>3</sub> is selected from the group consisting of hydrogen, an alicyclic group, a heterocyclic group, an aryl group, a heteroaryl group, an alkylaryl group, a substituted aryl group, a substituted alkylaryl group, and p-aroyl-glutamate;

and each substituent of any substituted group is the same or different and is selected from the group consisting of a straight or branched lower alkyl, alkenyl, alkynl or
